Validator Interface

Previous approach

Not deprecated

Business logic

Service Tier

Dependency

```xml
<dependency>
  <groupId>org.hibernate.validator</groupId>
  <artifactId>hibernate-validator</artifactId>
  <version>6.1.1.Final</version>
</dependency>
```

```
public String submit(
  @Valid @ModelAttribute("person")
Person person,
  BindingResult result,
  ModelMap modelMap) {
```

◄ **Use @Valid**

◄**BindingResult reference**

```
<form:errors path="name"
cssClass="error" />
```

◄**Form errors tag**

Summary
